showvikbiswas@hotmail.com ◇ [LinkedIn](#)

Undergraduate final year student at CSE, BUET in the final term (Level 4, Term 2)

EDUCATION

Bachelor of Science, Bangladesh University of Engineering and Technology 2019 - 2024
CGPA: 3.82/4.00 (average over 7 semesters)

A Levels, Dhanmondi Tutorial 2016 - 2018
3 A* s in Physics, Chemistry and Mathematics

O Levels, Dhanmondi Tutorial 2015 - 2016
7 A* s, 1 A

RESEARCH EXPERIENCE

Thesis Title: A Cell-Cell Communication Based Prediction Model for Target Gene Expression in Single Cell Spatial Transcriptomics Data

Thesis Supervisor: Dr. Mohammad Saifur Rahman

Area: Bioinformatics

With advances in cell imaging technology, it is now possible to simultaneously unravel spatial locations of cells and their RNA expressions inside a tissue. In our research, we are trying to find out “micro-environments” produced by various cell types in a tissue sample and model their effect on the RNA expressions produced.

WORK EXPERIENCE

Research Assistant 2022-present
IWFM, BUET *Dhaka Bangladesh*

Created a web-based interface for visualization of modelled data for water levels across river zones in Bangladesh.

Intern 2022
MySoft Limited *Dhaka, Bangladesh*

Performed health data analytics on data availed from customers of MySoft and visualized them in a web application using Angular JS.

SKILLS

Technical Skills	Database Management, Backend Engineering, Frontend Design, Data Analytics
Programming Language Skills	Python, C, C++, SQL, Java, JavaScript
Technological Skills	Django, NodeJS, AWS, GitLab, GitHub Actions, Firebase

NOTABLE PROJECTS

Fantasy League (Database) Built a web-based mock of the original Fantasy Premier League with additional features using Django, ReactJS and Oracle as part of our Database Management sessional course offered in Level 2, Term 2.

CommuniCreate (Web Development) Built a web-based marketplace for creative agencies and prospective customers as part of our Software Development sessional course in Level 4, Term 1.

[\(Try it here!\)](#)

HireDo (Web Development) Built the backend for a web-based marketplace for blue-collar jobs. Users can send requirements of what jobs they need to be done, and applicants can actively respond to and track their jobs.

[\(Try it here!\)](#)

Ray Tracer (Computer Graphics) Built a ray tracer as an assignment of our Computer Graphics course in Level 4, Term 1. The program featured a fully ray-traced scene-builder with arbitrary levels of reflection calculations to render the final image.

Flower Classification (Machine Learning) Used existing CNNs and Transformer-based neural network architectures with state of the art augmentation techniques to build a model which can identify 30+ different types of flowers from JPEG images as part of our Machine Learning course in Level 4, Term 2.

ACHIEVEMENTS

- Received RISE Internal Research Grant 2023 for my undergraduate thesis equivalent to a sum of 1,00,000 BDT.
- Dean's List awardee, January 2019.
- Distinction marks achieved in A Levels Chemistry, January 2018.
- Pearson Edexcel High Achievers' Award 2018 winner.
