Lecturer at Department of CSE, BRAC University.

EDUCATION

Bachelor of Science , Bangladesh University of Engineering and Technology CGPA: 3.85/4.00	2019 - 2024
---	-------------

A Levels , Dhanmondi Tutorial 3 A* s in Physics, Chemistry and Mathematics	2016 - 2018
--	-------------

O Levels , Dhanmondi Tutorial 7 A* s, 1 A	2015 - 2016
---	-------------

RESEARCH EXPERIENCE

Undergraduate Thesis: A Cell-Cell Communication Based Prediction Model for Target Gene Expression in Single Cell Spatial Transcriptomics Data

Thesis Supervisor: Dr. Mohammad Saifur Rahman

Area: Bioinformatics

WORK EXPERIENCE

Lecturer Department of CSE, BRAC University	2024-present <i>Dhaka Bangladesh</i>
---	---

Research Assistant IWMF, BUET	2022-2024 <i>Dhaka Bangladesh</i>
---	--------------------------------------

Created a web-based interface for visualization of modelled data for water levels across river zones in Bangladesh.

Intern MySoft Limited	2022 <i>Dhaka, Bangladesh</i>
---------------------------------	----------------------------------

Performed health data analytics on data availed from customers of MySoft and visualized them in a web application using Angular JS.

SKILLS

Technical Skills	Database Management, Backend Engineering, Frontend Design
Programming Language Skills	Python, C, C++, SQL, Java, JavaScript
Technological Skills	Django, NodeJS, AWS, GitLab, GitHub Actions, Firebase

NOTABLE PROJECTS

Fantasy League (Database) Built a web-based mock of the original Fantasy Premier League with additional features using Django, ReactJS and Oracle as part of our Database Management sessional course offered in Level 2, Term 2.

CommuniCreate (Web Development) Built a web-based marketplace for creative agencies and prospective customers as part of our Software Development sessional course in Level 4, Term 1.

[\(Try it here!\)](#)

HireDo (Web Development) Built the backend for a web-based marketplace for blue-collar jobs. Users can send requirements of what jobs they need to be done, and applicants can actively respond to and track their jobs.

[\(Try it here!\)](#)

Ray Tracer (Computer Graphics) Built a ray tracer as an assignment of our Computer Graphics course in Level 4, Term 1. The program featured a fully ray-traced scene-builder with arbitrary levels of reflection calculations to render the final image.

Flower Classification (Machine Learning) Used existing CNNs and Transformer-based neural network architectures with state of the art augmentation techniques to build a model which can identify 30+ different types of flowers from JPEG images as part of our Machine Learning course in Level 4, Term 2.

ACHIEVEMENTS

- Received RISE Internal Research Grant 2023 for my undergraduate thesis equivalent to a sum of 1,00,000 BDT.
- Dean's List awardee, January 2019.
- Distinction marks achieved in A Levels Chemistry, January 2018.
- Pearson Edexcel High Achievers' Award 2018 winner.
